

## **DEAR PARENTS (ECP)**

Our class has begun the next project which is on “Rain”. It will last for about 2 weeks. A project motivates students to explore and experience.

We are taking the children through a rain discovery to explore with their senses. We would like you to discuss the following with your child on the topic.

How does the rain feel on his/her skin?

How does the rain make the outdoors smell?

What does the rain sound like?

What does the rain look like in the sky? On the ground?

What does the rain taste like on your tongue?

Can you see a rainbow after rains?

Kindly encourage your child to talk about the project and his/her involvement in activities.

Thank you for participating in your child’s learning and also for your valuable contributions for our last project on “Mango”
